DETAILED ACTION

1. This is in response to Applicant's communication dated February 17, 2004. Claims 1-36 are currently pending and are subject to restriction/election as discussed below.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11 and 19-29, drawn to a computer implemented method and an article of manufacture for preparing bank service charge reports for banking activity of a client, classified in class 705, subclass 34.

II. Claims 12-18 and 30-36, drawn to a computer implemented method and an article of manufacture for preparing earnings credit reports for banking activity of a client, classified in class 705, subclass 35.

3. Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I relates to preparing bank service charge reports, whereas invention II relates to preparing earnings credit reports. The former pertains to banking related expenses of a client, inputting service charge items and automatically creating one or more bank service charge reports for the client. The latter pertains to banking related earnings of a client, inputting bank earnings credit items and automatically creating one or more earnings credit reports for the client. The methods of these two inventions can be used independent of each other and have different utilities (one provides expense reports and the other provides earnings reports) See MPEP § 806.05(d). Because these inventions are distinct for the

reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call made to Mr. Clark A. Jablon on April 30, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicants are advised that reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Narayanswamy Subramanian whose telephone number is (703) 305-4878. The examiner can normally be reached Monday-Thursday from 8:30 AM to 7:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached at (703) 308-1065. The fax number for Formal or Official faxes The Patent Office is (703) 872-9306. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1113.
